2.04 Structure Contents and Presentation of Financial Statements:

The Financial Statements are presented in accordance with the guidelines provided by BAS-1: "**Presentation of Financial Statements**" A complete set of financial statements comprise:

i) Statement of Financial Position (Unaudited) as at December 31, 2017.
ii) Statement of Profit or Loss and Other Comprehensive Income (Unaudited) for the period ended December 31, 2017.
iii) Statement of Changes in Equity (Unaudited) for the period ended December 31, 2017.
iv) Statement of Cash Flows (Unaudited) for the period ended December 31, 2017.
v) Notes, comprising a summary of significant accounting policies and other explanatory information.

2.05 Reporting Period:

The Financial period of the company covers 06 months from July 01, 2017 to December 31, 2017.

2.06 Financial & Reporting Currency:

These Financial Statements are prepared and presented in Bangladeshi Taka which is the functional and reporting currency of the company.

2.07 Comparative Information:

Comparative information has been disclosed in respect of the previous period for all numerical information in the financial Statements and also the narative and descriptive information when it is relevant for understanding of the current period financial statements. Previous period figure has been re-arranged whenever considered necessary to ensure comparability with the current period presentation as per BAS-8 :" Accounting Policies, Changeses in Accounting Estimates and Errors"

2.08 Leases

A lease is an agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time .

A lease is classified as either an operating or a finance lease and in the case of a finance lease the amounts to be recognised at the commencement of the lease term are determined.

A finance lease is a lease that transfers substantially all the riskys and rewards incidental to owwership of an asset. Title may or may not eventually be transferred. An operating lease is a lease other than a finance lease.

2.09 Risk and uncertainty for use of estimates (Provisions):

The Preparation of Financial Statements in conformity with Bangladesh Accounting Standards/BFRS requires recognition and measurement of principal the use of management to make estimates and assumptions that affect the reported amounts of revenue and expenses, assets and liabilities and disclosure requirements for contingent assets and liabilities during and the date of the Financial Statements. Due to inherent uncertainty involved in making estimates, actual reported results could differ from those estimates.

In accordance with the guidelines in **BAS-37 "Provisions, Contingent Liabilities and Contingent Assets"**, provisions are recognized in the following situations:

- When the company has a present obligation as a result of past events
- When it is probable that an outflow of resources embodying economic benefits with be required to settle the obligation
- When a reliable estimate can be made of the amount of the obligation.

2.10 Accruals & Deferrals:

Deferrals and accruals have been made as per the guidance in **BAS-1 "Presentation of Financial Statements"**. In order to meet their objectives, Financial Statements, except for the Statement of Cash Flows and related information, are prepared on accrual basis of accounting. Under the basis the effects of transactions and other events are recognized when they occur (and not when cash or its equivalent is received or paid) and they are recorded in the accounting records and reported in the Financial Statements of the period to which they relate.

Other payable are not interest bearing and are stated at their nominal value.

2.11 Going Concern:

As per **BAS-1** a company is required to make assessment at the end of each year to assess its capability to continue as going concern. Management of the Company makes such assessment each year. The company has adequate resources to continue in operation for the foreseeable future and has wide coverage of its liabilities. For this reason the Directors continue to adopt the going concern assumption while the financial statements are prepared.

2.12 Financial Instruments:

A financial instrument is any contract that gives rise to financial assets and a financial liability or equity instrument of another entity.

Financial assets:

Financial assets of the company include cash and cash equivalents, accounts receivable, other receivables and equity instrument of another entity. The company initially recognized receivable on the date they are originated. All other financial assets are recognized initially on the date at which the company becomes a party to the contractual provision of the transaction. The company derecognizes a financial asset when, and only when the contractual rights or probabilities of receiving the cash flows on the financial assets in a transaction in which substantially all the risk and rewards of ownership of the financial assets are transferred.

Financial liability:

Financial liabilities are recognized initially on the transaction date at which the company becomes a party to the contractual provisions of the liability. The company derecognizes the financial liabilities when its contractual obligations are discharged or cancelled or expired. Financial liabilities includes payable for expense, liability for capital expenditure and other current liabilities.

2.13 Impairment:

I) Financial Assets:

Accounts receivable and others receivable are assessed at each reporting date to determine whether there is any objective evidence of impairment. Financial assets are impaired if objective indicates that a loss event has occurred after the initial recognition of the asset and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably. Objective evidence that financial assets are impaired can include default of delinquency by a debtor, indicates that a debtor of issuer will enter bankruptcy etc.

II) Non-Financial assets:

An asset is impaired when its carrying amount exceeds its recoverable amount. The company assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exits, the company estimates the recoverable amount of the asset. The recoverable amount of an asset is the higher of its fair value less cost to sell and its value in use. Carrying amount of the assets is reduced to its recoverable amount by recognizing an impaired loss is recognized immediately in statement of comprehensive income unless the asset is carried at revalued amount. Any impaired loss of a revalued asset treated as a revaluation decrease. During the period no impaired loss occurred to recognize in the Financial Statements.

2.14 Cash and Cash Equivalents and Statement of Cash Flows:

Cash and cash equivalents comprise cash in hand and in current account that readily convertible to known amount of cash and that are not subject to significant risk of change in value.

The Statement of cash flows is prepared using the Direct Method as stipulated in Bangladesh Accounting Standards **BAS-7 "Statement of cash flows"**.

2.15 Related Party Disclosures:

The Company in normal course of business carried out a number of transactions with directors/entities that fall within the definition of related party contained in Bangladesh Accounting Standard 24: Related Party Disclosures. The disclosure relating to related parties have been shown in note # 44.

2.16 Events after the Reporting Period:

In compliance with the requirements of **BAS 10**: Adjusting Events after the reporting period, "Post Balance Events" that provide additional information about the company's position at the balance date are reflected in the financial statements and events after the balance sheet date that are not adjusting events are disclosed in the notes when material.

Date of Authorization:

These Financial Statements have been authorized for issue by the Board of Directors on January 27, 2018.

Approval for issuance of right shares

The Bangladesh Securities and Exchange Commission (BSEC) has accorded approval for Right Issue of IFAD Autos Limited through its letter no. BSEC/CI/RI-113/2017/535 dated September 26, 2017 for raising of paid up capital through issuance of 62,192,000 Ordinery Shares of Tk. 10.00 each issuing at Tk. 20.00 each, including a premium of Tk. 10.00 per share , totaling of Tk. 1,243,840,000.00 offered on the basis of 02 (two) right shares for 05(five) existing shares held on the record date. The subscription was closed on December 14, 2017 and the subscription money credited to the company's bank account upto December 31, 2017 has been shown under the head Right Shares Money Deposit as the right shares are alloted on as well as credited to the respective shareholders BO account on January 03, 2018.

2.17 Revenue Recognition:

In compliance with the requirements of **BAS-18 "Revenue"**, revenue is recognized to the extent that it is probable that the economic benefits will flow to the entity and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable excluding VAT, discounts, commissions, rebates and other sales taxes where applicable.

Revenue from the sale of goods is recognised when the following conditions are satisfied:

a) the entity has transferred to the buyer the significant risks and rewards of ownership of the goods
b) the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold
c) the amount of revenue can be measured reliably
d) it is probable that the economic benefits associated with the transaction will flow to the entity
e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

2.18 Property, Plant and Equipment:

2.18.01 Recognition and Measurement:

Property Plant and Equipment (including assets acquired under finance lease) are capitalized at cost of acquisition and subsequently stated at cost /revalued amount less depreciation in compliance with the requirements of **BAS-16 "Property, Plant and Equipment"**. The cost of acquisition of an asset comprises its purchase price and any directly attributable cost of bringing the assets to its working condition for its intended use inclusive of inward freight, duties non-refundable taxes and un-allocated expenditures etc. The land and land developments and building have been revalued by an independed valuer to reflect fair value (prevailing market price) thereof following "Current Cost Method". The Company has adopted "Revaluation Model" for stating property, plant & equipment.

2.18.02 Subsequent Expenditure:

The Company recognizes in the carrying amount of an item of property, plant and equipment the cost of replacing part of such an item when that cost is incurred, it is probable that the future economic benefits embodied with the item will flow to company and the cost of the item can be measured reliably. Expenditure incurred after the assets have been put into operation, such as repairs and maintenance is normally charged off as revenue expenditure in the period in which it is incurred. In situation where it can be clearly demonstrated that the expenditure has resulted in an increase in the future economic benefit expected to be obtained from the use of the fixed assets, the expenditure is capitalized as an additional cost of the assests. All other cost are recognized to the profit and loss account as expenses if incurred. All up-gradation/enhancement are generally charged off as revenue expenditure unless they bring similar significant additional benefits.

2.18.03 Disposal of Property, Plant and Equipment:

On disposal of Property, Plant and Equipment, the cost and accumulated depreciation are eliminated and gain or loss on such disposal is reflected in the statement of profit or loss and other comprehensive income statement, which is determined with reference to the net book value of the assets and net sale proceeds.

2.18.04 Depreciation of Property, Plant and Equipment:

Depreciation is provided to amortize the cost or valuation of the assets after commissioning, over the year of their expected useful lives, in accordance with the provisions of **BAS-16 "Property, Plant and Equipment"**. Depreciation is provided on all fixed assets except Land & Land development from the date when the related assets are available for use over the periods appropriate to the estimated useful lives of the different types of assets at the following rates on reducing balance basis:

Particular of Assets	Rate of Depreciation
Land & Land Developments	0%
Buildings & Civil Construction	5%
Flat	2%
Tools & Equipment	10%
Plant & Machinery	10%
Furniture & Fixtures	10%
Office Equipment	10%
Electric Equipment	10%
Motor Vehicles	10%

The fair value of the property, plant and equipment on 31.12.2017 is not materially differing with the carrying amount except the revaluation made as follows:

Revaluation of Property, Plant and Equipment

The Company made revaluation of its land and land developments and buildings on June 30,2016 to reflect fair value of the property in terms of the prevailing market price of the properties. Details of revaluation are shown below :-

Particulars of the assets	Name of the Valuer	Qualification of the Valuer	Date of Revaluation	Carrying amount of Assets	Value of Assets after revaluation	Revaluation Surplus
Land and Land developments	Mahfel Haq & Co.	Chartered Accountants	June 30,2016	711,701,943	1,841,566,386	1,129,864,443
Buildings & Civil Construction	Mahfel Haq & Co.	Chartered Accountants	June 30,2016	393,225,600	442,113,434	48,887,834
Flat	Mahfel Haq & Co.	Chartered Accountants	June 30,2016	22,733,680	22,733,680	-
Total				**1,127,661,223**	**2,306,413,500**	**1,178,752,277**

2.19 Inventories:

Inventories are valued at the lower of cost and net realizable value as per **BAS-2** Initial costs of inventories consist of purchase price cost of conversion import duties and other non-refundable taxes and other costs incurred in bringing the inventories to their present location and condition Subsequent cost of inventory is assigned by using FIFO (First In First Out) cost formula. Net realizable value is based on estimated selling price less estimated cost for completion and selling expenses.

2.20 Receivables:

Trade Receivables are stated their real value and consider good. No provision has been made for doubtful debts and no amount was written off as bad.

2.21 Advances, Deposits and Prepayments:

Advances are initially measured at cost. After initial recognition advances are carried at cost less deductions or adjustments. Deposits are measured at payment value. Prepayments are initially measured at cost. After initial recognition prepayments are carried at cost less charges to the statement of Profit or Loss and other Comprehensive Income.

2.22 Provision for Taxation:

Current Tax

Provision is made for current tax on business income @ 25% or advance income tax deducted at source under section 53 of the income tax ordinance 1984 at 5% of the import value whichever is higher, except for other income @ 10% ~ 25% thereof as per the income tax ordinance, 1984

Deferred Tax

Deferred tax liabilities are the amount of income taxes payable in future years in respect of taxable temporary differences. Deferred tax assets are the amount of income taxes recoverable in future years in respect of deductible temporary differences. Deferred tax assets and liabilities are recognized for the future tax consequences of timing differences arising between the carrying values of assets, liabilities, income and expenditure and their respective tax bases. Deferred tax assets and liabilities are measured using tax rates and tax laws that have been enacted or subsequently enacted at the financial statement date.

2.23 Foreign Currency Transaction:

Foreign currency transactions are recorded, on initial recognition in the functional currency at the spot exchange rate ruling at the transaction date.

At the end of each reporting period, in compliance with the provision of **BAS 21**: The Effects of Changes in Foreign Exchange Rates, are determined as under :

(a) Foreign currency monetary items are translated using the closing rate.
(b) Non-monetary items that are measured in terms of historical costs in a foreign currency are translated using the exchange rate at the date of the transaction.
(c) Non-monetary items that are measured at fair value in a foreign currency is translated using the exchange rate at the date when the fair value is determined

Exchange differences arising on the settlement of monetary items or on translating monetary items at rate different from those at which they were translated on initial recognition during the period or in previous financial statements is recognized in profit or loss in the period in which they arise.

2.24 Employee Benefits

The company maintains defined contribution plan and defined benefit plan for its eligible permanent employees. The eligibility is determined according to the terms and conditions set forth in the respective agreements/trust deeds.

The company has accounted for and disclosed employee benefits in compliance with the provision of**BAS 19** : Employee Benefits

The cost of employee benefit is charged off as revenue expenditure in the period to which the contributions relate.
The company's employee benefits include the following.

Workers Profit Participation Fund (WPPF):
During 2014-2015, the Company has introduced Worker Profit Participation Func for its employees in accordance with provisions of **Bangladesh Labour Act 2006 Sec-232(1).**

2.25 Earnings Per Share:

The Company calculates its earnings per share in accordance with Bangladesh Accounting Standard **BAS-33 "Earnings Per Share"** which has been reported on the face of statement of Comprehensive Income.

Basic Earnings per Share
The Company present its basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the company outstanding during the period.

Diluted Earnings Per Share
No diluted earnings per share is required to be calculated for the period as there was no scope for dilution during the period.

2.26 Cash Flows from Operating Activities:

In view of the company's sales of vehicles upto 60 installments the cash received from customers falls short of cash paid to suppliers and employees, the shortfall being funded by finance from bank and financial institutions.

2.27 Borrowing Costs:

The borrowing cost were capitalized unless active development of relatec assets were interrupted or cease when the active development were cease the borrowing cost directly transferred to the expenses as per **BAS-23 "Borrowing Costs"**.

2.28 Non-current Assets Held for Sale and Discontinued Operations:

An entity shall classify a non-current asset (or disposal group) as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use. An entity shall measure a non-current asset (or disposal group) classified as held for sale at the lower of its carrying amount and fair value less costs to sel.

2.29 Operating Segments

An operating segment is a component of an entity
(a) that engages in business activities from which it may earn revenues and incure expenses
(b) whose operating results are regularly reviewed by the entitys chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance and
(C) for which discreate financial information is available

An entity shall report separately information about an operating segment that meets any of the following quantitative theresholds:

(a) Its reported revenue
(b) The absolute amount of its reported profit or loss
(C) Its assets are 10 percent or more of the combined assets of all operating segments
Detail disclosed in **Annexure number # B**

2.30 Risk Exposure:

An investment in equity shares involves a high degree of risk. The Company is operating in an industry involving both external and internal risk factors having direct as well as indirect effects on the investment by the investors. All the investors should carefully consider all of the information in these financial statements, including the risk factors, both external and internal, and management perception there about enumerated hereunder before making an investment decision. If any of following risks actually occurs, their business, result of operations and financial condition could suffer, the trading price of their equity shares decline, and investors may lose all or part of their investment.

2.30.01 Interest rate risks:

Interest rate is concerned with borrowed funds of short term & long-term maturity. Interest rate risk is the risk that the Company faces due to unfavorable movements in the interest rates. Volatility in money market & increased demand for loans /investment funds raise the rate of interest. A change in the government's policy also tends to increase the interest rate. High rate of interest enhances the cost of fund of a company. Such rise in interest rates however mostly affect companies having floating rate loans.

Management perception

IFAD Autos Limited maintains a reasonable debt/ equity ratio; and accordingly, adverse impact of interest rate fluctuation will not adversely affect the Company's performance as such interest is recoverable from the customer. The project was started with the Company's own funcs and the capacity was also expanded with own funds. Additionaly, the management of the Company emphasizes on equity base financing to reduce the dependency on borrowing. Tierefore, management perceives that the fluctuation of interest rate on borrowing would have little impact upon the performance of the Company.

2.30.02 Exchange rate risks:

If exchange rate increases against local currency opportunity is created for getting more revenue against sale in local currency. On the other hand, if exchange rate goes down, margin is squeezed in local currency.

Management perception

The products of the company are sold against local currency and payments for raw materials are made mostly in foreign currency. The exchange rate of the country traditionally witnessed upward trends. If foreign exchange rate rises, it will affect the whole market of the commercial vehicles. The sales price of the commodities is adjusted for exchange fluctuation accordingly. Since, IAL has a good brand image in the market; exchange fluctuation will not affect its sales. Therefore, volatility of exchange rate will have little impact on profitability of the Company.

2.30.03 Industry risks:

Industry risk refers to the risk of increased competition from foreign and domestic sources leading to lower prices, revenues, profit margin, and market share which could have an adverse impact on the business, financial condition and results of operation. Auto industry in Bangladesh is a flourishing sector with vast local demand for its different product lines.

Management perception

IFAD Autos Limited has established its brand name in commercial vehicles market with its quality products, range of products and customer services. However, to develop an infrastructure, both public and private sector participation is required. This is the focal point of IAL's future expansion plans that would reduce industry risk.

2.30.04 Market and technology-related risks:

Market risks

Market risk refers to the risk of adverse market conditions affecting the sales and profitability of the Company. Mostly, the risk arises from falling demand for the product or service which would harm the performance of the company. On the other hand, strong marketing and brand management would help the company to increase their customer base.

Management perception

Market for imported commercial vehicles in Bangladesh is growing at an exponential rate with growth of urbanization and incremental income level of consumers along with their preference to convenience. In spite of high growth of this market, there is scarcity of investment in this sector which creates a demand-supply enabling the Company to penetrate and capture the leading position with its unique branding and positioning strategy taking opportunity of this fast growing market.

Technology-related Risks

Technology always plays a vital role for the existence of any industrial concern, ensuring better services to the customers and minimizing the cost in various aspects. The assembling facilities of the Company are based on currently available technology. Any invention of new and more cost involving technology may cause technological obsolescence and negative operational efficiency. Any serious defects in the plant and machinery may affect production and profitability calling for additional investment for replacement.

Management perception

The key to securing market share in trading of commercial vehicles is by satisfying the needs of the customers. IFAD Autos Limited utilizes its Market Research Team that is continuously working for in-depth understanding of the customer needs and preferences and accordingly, arranging its product range.

2.30.05 Potential or existing government regulations risks:

The Company operates under Companies Act, 1994; Income-tax Ordinance, 1984; Income Tax Rules, 1984; Value Added Tax (VAT) Act, 1991 and Value Added Tax (VAT) Rules, 1991. Any abrupt changes of the policies made by the regulatory authorities may affect its activities.

Management perception

Unless any policy change that may negatively and materially affect the industry as a whole, the business of the Company is expected not to be affected significantly. Auto industry in Bangladesh is a flourishing sector with considerable local demand for different product lines. Therefore, it is highly unlikely that the Government will initiate any fiscal measure that may have adverse effect on the growth of the industry.

2.30.06 Potential changes in global or national policies:

The performance of the company may be affected by the political and economical instability, both in Bangladesh and worldwide. Any instance of political turmoil and disturbance in the country may adversely affect the economy in general.

Management perception

The Company can prosper in a situation of political stability and a congenial business environment. Political turmoil and disturbance are bad for the economy and so also for this sector. The Company is always aware of all types of turmoils and if the smooth supply of material is hampered or faces any kind of disruptions, it will supply it in future and try to keep its oprations smooth.

2.30.07 History of non-operation, if any:

History of non operation indicates weak operational management of the Company. Non operation leads to negative cash flow, incurring of losses and bankruptcy in worst case scenario.

Management perception

The Company is in business since 1988. There is no history of non operation in business of the Company till now. The Company has an independent body which is operated by its Memorandum & Articles of Association and other applicable laws and regulations of the country. The financial strength of the Company is very satisfactory. The Directors of the Board are well reputed and experienced and the operation of the company is guided by a good team of professionals. The chance of non-operation of the business of the Company is negligible.

2.30.08 Operational Risks:

Operational risks refer to the possibility of plant shut down due to disruption in supply of gas, technological failure, natural calamities, human errors and other unforeseen events. Such incidences may lead to non operation, large overhauling costs and financial losses.

The core business operation of IFAD Autos Limited is directly related to assembling and maintaining the products. Country wide severe power shortage is compelling IFAD Autos Limited to utilize captive power which builds up cost. Also port congestion and inland immobility due to political instability poses a great operational risk to IFAD Autos Limited.

Management perception

Bangladesh Government is meeting this challenge by opening the energy generation to private sector, and also making massive investment, which is expected to ensure availability of energy for uninterrupted operation. IFAD Autos Limited perceives that allocation of its resources properly with contingency approaches can reduce this risk factor to great extent.

2.30.09 Input Cost Risks:

Input cost risk is the risk of a business when procuring materials or commodities in high global demand. Increasing demand and supply shortages create volatility in these commodity values; and therefore, the timing, quantity and price of purchase must be closely planned.

Management Perception

Management of IFAD Autos Limited would hedge their exposure to input price volatility by adjusting its selling price.

2.30.10 Distribution Risk:

For any company, the most crucial wing is the distribution channel. Wide distribution network and monitoring over the network is essential to make its product available to the consumer at right time and price.

Management perception

IFAD Autos Limited offers a wide range of commercial vehicles in local market. Its distribution strategy comprises of distributors for local markets and distribution network of dealers and outlets for domestic market. IFAD Autos Limited plans to eliminate distribution risk implications by smartly planning its distribution network with great flexibility.

2.31 Statements of Changes in Equity:

Statement of changes in equity is prepared in accordance with **BAS-1 "Presentation of Financial Statements"**. This statement reflects information about the increase or decrease in net assets or wealth.

2.32 Interim Financial Reporting:

Interim period is a financial reporting period shorter than a full financial year.

Interim financial report means a financial report containing either a complete set of financial statements (as described in **BAS 1** Presentation of Financial Statements) or a set of condensed financial statements for an interim period.

2.33 Capital Work-in-progress:

Property, plant and equipment under construction/acquisition is accounted for as capital work-in-progress until construction/acquisition is complete and measured at cost.

2.34 Net Asset Value per share (NAVPS):

Net Asset Value per share (NAVPS) has been calculated by dividing net asset value reported in the statement of financial position by the number of ordinary shares in issue.

3.00 General:

Figures appearing in the financial statements have been rounded off to the nearest Taka.
